

ROMAN MUSIC THERAPY SERVICES

No two people are alike. At Roman Music Therapy Services we recognize that each individual and organization we serve has unique needs. We have learned that with all things, a one-size-fits- all approach does not work! To be grounded in the work that we do, we focus on three tenets in our work.

- 1: Our human-centered approach to music therapy requires that we thoughtfully adapt our responses and music interventions to the dynamic needs of the client.**
- 2. As community music therapists, we focus on the two-way connections between individuals and communities in all that we do to help build bridges and social capital**
- 3. Music therapy serves our communities best with a continuum of options**
